Subject: Mining Ponds Question

Hello Mark:

I am working on the ESA Section 7 consultation and Biological Assessment for the Uranium In-Situ mining in the Dewey Burdock Area (Powertech). This project will have some ponds that will required bird deterrents such as bird balls, netting, or other methods to protect ESA species and other bird/animal species from reaching these ponds.

Do you know of a List - maximum contaminant level (MCL) trigger value for ponds related to mining operations in SD?

or

Can you refer me to the right person?

Thank you!

Regards,

Omar Sierra-Lopez
